Foreword

HG/T 6533-2026 is a recommended industry standard of the People's Republic of China in the Chemical Industry sector, approved and issued by the Ministry of Industry and Information Technology on 15 July 2026, with effect from 1 February 2027.

It is administered by the National Technical Committee for Rubber and Rubber Products Standardization.

Classification: ICS 83.040.01; CCS G48.

1 Scope

HG/T 6533-2026 is the Chinese chemical industry standard for reclaimed butadiene-acrylonitrile rubber, the recovered form of nitrile rubber. It sets out the technical provisions for this reclaimed rubber, so that those who produce it and those who use it in rubber compounds can describe and assess it consistently. The English translation reproduces the full text of the Chinese original.

The standard is relevant to reclaimed rubber producers, rubber product manufacturers who buy the material, and laboratories that test it. The /T in the code shows that it is a voluntary industry standard. It was approved by the Ministry of Industry and Information Technology on 15 July 2026 and takes effect on 1 February 2027. It is a new document and does not replace an earlier edition.
