Foreword

HG/T 6541-2026 is a recommended industry standard of the People's Republic of China in the Chemical Industry sector, approved and issued by the Ministry of Industry and Information Technology on 15 July 2026, with effect from 1 February 2027.

It is administered by the National Technical Committee for Paint and Pigment Standardization.

Classification: ICS 87.060.10; CCS G54.

1 Scope

HG/T 6541-2026 is the Chinese chemical industry standard for aluminum tripolyphosphate pigments. It sets out the technical provisions for this pigment, so that producers and buyers can describe, test and accept it on the same basis. The English translation gives the full text of the Chinese original, which belongs to the national work on paint and pigment standardization.

The standard is useful to pigment manufacturers, coating producers who buy the material, and laboratories that test it. The /T in the code shows that it is a voluntary industry standard. It was approved by the Ministry of Industry and Information Technology on 15 July 2026 and takes effect on 1 February 2027. It is a new document and does not replace an earlier edition.
