

HJ

INDUSTRY STANDARD OF THE PEOPLE'S REPUBLIC OF CHINA

HJ 1109-2020

**Technical specification for application and issuance of
pollutant permit - Farm and sideline food processing industry -
Aquatic products processing industry
(English Translation)**

Issued on: February 28, 2020

Implemented on: February 28, 2020

Issued by: Ministry of Ecology and Environment

Table of Contents

Foreword

1 Scope of application

2 Normative references

3 Terms and definitions

4 Requirements for the declaration of the basic situation of the pollutant discharge unit

5 Corresponding discharge outlets in the production and discharge process and methods for determining permitted discharge limits

6 Feasible technical requirements for pollution prevention

7 Self-monitoring management requirements

8 Requirements for preparation of environmental management ledger records and execution reports

9 Accounting Method of Actual Emissions

10 Compliance Judgment Method

Appendix A (informative appendix) Reference method for calculating the allowable discharge of wastewater pollutants

Appendix B (informative appendix) Reference table of feasible technologies for wastewater pollution prevention and control

Appendix C (Informative Appendix) Reference Table of Available Technologies for Waste Gas Pollution Prevention and Control

Appendix D (Informative Appendix) Reference Table for Environmental Management Ledger Records

Appendix E (Normative Appendix) Accounting Method for Actual Wastewater Pollutant Discharge

Foreword

In order to implement the "Environmental Protection Law of the People's Republic of China", "The Air Pollution Prevention Law of the People's Republic of China", "China the Water Pollution Prevention and Control Law of the People's Republic of China, the Soil Pollution Prevention and Control Law of the People's Republic of China and other laws and regulations, and the Office of the State Council Notice on Issuing the Implementation Plan of the Permit System for Controlling Pollutant Discharge (Guobanfa [2016] No. 81), Manageable Measures (for Trial Implementation)" (Ministry of Environmental Protection Order No. 48) to improve the technical support system for pollutant discharge permits, guidance and regulations this standard is formulated for the application and issuance of

pollutant discharge permits for the aquatic product processing industry.

This standard stipulates the basic requirements and permits for the application and issuance of pollutant discharge permits for aquatic product processing industries.

Determination of emission limit, actual emission calculation and compliance determination methods, as well as self-monitoring, environmental management accounting and pollution discharge Environmental management requirements such as the permit implementation report put forward reference requirements for feasible technologies for pollution prevention and control in aquatic product processing industries.

Appendix A to Appendix D of this standard are informative appendices, and Appendix E is a normative appendix.

This standard is issued for the first time.

This standard is formulated by the Department of Environmental Impact Assessment and Emission Management and the Department of Regulations and Standards of the Ministry of Ecology and Environment.

The main drafting organizations of this standard. Chinese Academy of Environmental Sciences, Light Industry Environmental Protection Research Institute.

This standard was approved by the Ministry of Ecology and Environment on February 28, 2020.

This standard will be implemented on February 28, 2020.

This standard is interpreted by the Ministry of Ecology and Environment.

1 Technical specifications for pollutant discharge permit application and issuance

Agricultural and sideline food processing industry-aquatic product processing industry

1 Scope of application this standard stipulates the basic requirements and permits for the application and issuance of pollutant discharge permits for aquatic product processing industries.

Determination of emission limit, actual emission calculation and compliance determination methods, as well as self-monitoring, environmental management accounting and pollution discharge Environmental management requirements such as the permit implementation report put forward reference requirements for feasible technologies for pollution prevention and control in aquatic product processing industries.

This standard is applicable to guide the aquatic product processing industry pollutants to fill in relevant information on the national pollutant discharge permit management information platform the application information is also applicable to guide the issuing authority to

review and determine the requirements of the pollutant discharge permit for the aquatic product processing industry.

This standard is applicable to the management of permits for the discharge of air pollutants and water pollutants discharged by pollutants from the aquatic product processing industry.

This standard does not apply to the pollutant discharge units of chemical products such as aquatic products production auxiliaries and additives and pharmaceuticals, and from it is a pollutant discharge unit that manufactures canned aquatic products and uses aquatic products and processing waste as raw materials to produce feed.

Among the aquatic product processing industry pollutants, those that implement the "Emission Standard of Air Pollutants for Thermal Power Plants" (GB 13223) Pollution facilities or discharge outlets are applicable to the "Technical Specifications for Application and Issuance of Pollution Permits for Thermal Power Industry";

Pollution production facilities or discharge outlets in the Pollutant Discharge Standard (GB 13271) are applicable to the "Pollution Discharge Permit Application and Issuance Technology" Specification for Boilers" (HJ 953).

Other pollution-producing facilities and discharge units of aquatic product processing industries that are not specified in this standard but discharge industrial waste water and waste gas to release the mouth, refer to the "General Rules for the Application and Issuance of Pollutant Discharge Permits" (HJ 942).

2 Normative references

The content of this standard refers to the following documents or their clauses. For undated references, the effective version is suitable Used in this standard.

GB 8978 Integrated Wastewater Discharge Standard GB 9078 Emission Standard of Air Pollutants for Industrial Furnaces GB 13223 Emission Standard of Air Pollutants for Thermal Power Plants GB 13271 Boiler Air Pollutant Emission Standard GB 14554 Emission Standard of Odor Pollutants GB 16297 Comprehensive Emission Standard of Air Pollutants GB 18483 Oil Fume Emission Standard for Catering Industry (Trial) HJ 91.1 Technical Specification for Wastewater Monitoring HJ 521 Wastewater Discharge Law Code (Trial) HJ 608 Code Rules for Pollutant Discharge Units HJ 860.2 Pollutant Discharge Permit Application and Issuance Technical Specification Agricultural and Sideline Food Processing Industry-Starch Industry HJ 942 General Rules of Technical Specifications for Pollution Discharge Permit Application and Issuance 2HJ 944 General Rules of Technical Specifications for Environmental Management Ledgers and Pollution Discharge Permit Implementation Report of Pollutant Discharge Units (Trial) HJ 953 Sewage discharge permit application and issuance of technical specifications for boilers HJ 986 Technical Guide for Self-monitoring of Pollutant Discharge Units Agricultural and Sideline Food Processing Industry "List of Classification Management of Discharge Permits for Fixed Pollution

Sources" "Administrative Measures for Pollution Discharge Permits (Trial)" (Ministry of Environmental Protection Order No. 48) "Technical Requirements for Standardized Remediation of Sewage Outlets (Trial)" (Environmental Supervision [1996] No. 470) "Announcement on the Implementation of Special Emission Limits for Air Pollutants" (Announcement No. 14 of 2013 by the Ministry of Environmental Protection) "Reply to Issues Concerning the Implementation of Special Emission Limits for Air Pollutants" (Huanban Qiqihan [2016] No. 1087) "Announcement on the Implementation of Special Emission Limits for Air Pollutants in Beijing-Tianjin-Hebei Air Pollution Transmission Channel Cities" (Environmental Protection Ministry Announcement No. 9 of 2018)

3 Terms and definitions

The following terms and definitions apply to this standard.

Pollutant emission unit of aquatic products processing industry Refers to using aquatic animals and plants as raw materials to process and produce frozen aquatic products, surimi and fish through physical, chemical or biological methods.

Sewage discharge units for processed aquatic products such as surimi products, dry pickled products, seaweed processed products, and fish oil products.

Permitted emission limits Refers to the maximum discharge concentration (rate) and discharge volume of pollutants that are allowed to be discharged by the pollutant discharge unit specified in the pollution discharge permit.

Special periods

Refers to the environmental quality compliance plan formulated by the local people's government according to law or other relevant environmental management regulations, the pollutant discharge of pollutants has special requirements for the time period, including the response period of heavy pollution weather and the winter prevention period.

Production period

Refers to the period of time from the start of production to the end of each production season of aquatic product processing industry pollutants, calculated on a daily basis.

4.1 Basic principles

The aquatic product processing industry pollutant discharge unit shall, in accordance with the requirements of this standard, register in the national pollutant discharge permit management information platform application system Fill in the corresponding information form. Those not included in the reporting system, the local ecological If you need to fill in, you can add content by yourself.

Local ecological and environmental authorities at or above the level of a city divided into
