What this standard covers

This standard stipulates the basic information filling requirements for the application and issuance of emission licenses for industrial noise emission units, methods for determining industrial noise emission limit values, as well as environmental management requirements such as self-monitoring, environmental management ledgers and emission license execution reports, and proposes pollution Prevention and control technical requirements and compliance determination methods. This standard is applicable to guide industrial noise and pollution discharge units to fill in the application information related to industrial noise for pollution discharge licenses, and to guide the approval department to review and determine the industrial noise pollution discharge license management requirements for industrial noise and pollution discharge units. This standard applies to pollutant discharge units that emit industrial noise and are required to apply for a pollutant discharge permit according to law.
