What this standard covers

This standard specifies the overall framework, information collection requirements, information exchange requirements and information security requirements for the supervision and management of sewage discharge outlets into rivers and seas. It is applicable to nodes at the national, river basin, provincial, municipal and below levels for sewage discharge into rivers and seas. Information collection and exchange activities for port supervision and management. This standard is applicable to guide local governments at all levels and relevant functional departments, as well as responsible entities responsible for sewage outlets into rivers and seas to organize, standardize implementation, supervise and manage the collection and exchange of information on sewage outlets into rivers and seas.
