What this standard covers

This standard stipulates the work procedures and overall requirements for the acceptance of completed environmental protection facilities in uranium mining and metallurgy decommissioning projects, and proposes technical requirements for initiating acceptance, self-inspection of acceptance, preparation of acceptance monitoring plan, implementation of acceptance monitoring and inspection, and preparation of acceptance monitoring report. This standard applies to the acceptance of completed environmental protection facilities for uranium mining and metallurgy decommissioning projects. The acceptance of completed environmental protection facilities for uranium mine geological exploration and decommissioning management projects can be implemented with reference to this standard.
