What this standard covers

This standard specifies the technical requirements for the application, demonstration, review, decision and signboard setting of river sewage outlets. This standard is applicable to guiding the responsible parties of river sewage outlets to apply for river sewage outlets and prepare demonstration materials for river sewage outlets. It is also applicable to guiding the basin ecological environment supervision and management agencies under the ecological environment department of the State Council and the ecological environment departments at all levels of the localities (hereinafter referred to as the competent departments) to carry out the approval or registration of river sewage outlets.
