What this standard covers

This standard specifies the monitoring points, monitoring indicators, monitoring frequency, monitoring methods, sample collection and analysis testing, quality assurance and quality control, information recording and reporting requirements for river sewage outlets. This standard applies to all kinds of monitoring activities carried out by the ecological environment authorities and relevant management departments, and the responsible entities of human-ocean sewage outlets in the supervision and management of human-ocean sewage outlets. This standard does not apply to the monitoring of radioactive substances and self-monitoring of pollutant discharge units included in the management of sewage discharge permits.
