What this standard covers

This standard specifies the technical requirements for metadata of the basic dataset of the phylum Arthropoda for the derivation of aquatic water quality benchmarks and metadata of related data elements. This standard is applicable to guiding and regulating the collection, storage and development of information systems for the necessary data of the phylum Arthropoda when deriving water quality benchmarks for freshwater organisms and marine organisms.

Document data

International classification (ICS): 13.020.

Chinese classification (CCS): Z04.

Estimated length of the Chinese original: 9,964 words.
