What this standard covers

This standard specifies the technical requirements for metadata of the basic data set of Echinodermata and metadata of related data elements for deriving water quality benchmarks for aquatic organisms. This standard is applicable to guiding and regulating the collection, storage and development of information systems for data required for Echinodermata when deriving water quality benchmarks for marine organisms.

Document data

International classification (ICS): 13.020.

Chinese classification (CCS): Z04.

Estimated length of the Chinese original: 6,611 words.
