What this standard covers

This standard specifies the technical requirements for pollutants and pollution loads, general requirements, process design, main process equipment and materials, testing and process control, main auxiliary projects, construction and acceptance, operation and maintenance management, etc. of medical waste centralized incineration and disposal projects. This standard is applicable to centralized medical waste incineration and disposal projects, and can be used as a reference for the design and construction, acceptance, and operation and management of environmental protection facilities for construction projects of centralized medical waste incineration and disposal projects. This standard does not apply to the incineration disposal project of co-processing medical waste and the pyrolysis project of medical waste without combustion reaction.

Document data

Chinese classification (CCS): C53.

Estimated length of the Chinese original: 17,197 words.

Supersedes the earlier edition HJ/T 177-2005.
