What this standard covers

This standard specifies three national environmental information network Internet backbone interconnection, as well as national environmental information network construction principles, the basic process, the backbone network, local area networking, IP addresses and domain planning, computer room construction and other technical requirements. This standard applies to the Ministry of Environmental Protection, the provinces, autonomous regions and municipalities directly under the Environmental Protection Agency (Bureau), the Xinjiang Production and Construction Corps, the Environmental Protection Agency (hereinafter referred to as the provincial Environmental Protection Agency (Agency)) and municipal environmental protection bureau of environmental information network construction work. District, county Environmental Protection Bureau and units directly under the environmental protection departments at all levels, the agency may also refer to the implementation.

Document data

International classification (ICS): 33.

Chinese classification (CCS): P76.

Estimated length of the Chinese original: 35,343 words.
