Water quality. Vocabulary. Part 1

水质 词汇 第一部分

(English Translation)

Issued on: November 5, 2010

Implemented on: March 1, 2011

Issued by: Ministry of Ecology and Environment

Table of Contents

Foreword
1 Scope of application
2 Noun terms
2.2 Storm sewage
2.3 Hypertrophic water hypertrophic water
2.4 Precipitation sedimentation
2.5 Stratification
2.6 Ozone treatment ozonation
2.7 Effluent
2.8 Degassing de-aeration
2.9 Deoxygenation
2.11 Surface water
2.12 Groundwater
2.13 Electrodialysis
2.14 Sewage saprophytic water polysaprobic water
2.15 Reverse osmosis reverse osmosis
2.16 Denitrification
2.17 Fluorination fluoridation
2.18 Flotation; floatation
2.19 Humus detritus
2.20 Humus detritus
2.21 Eutrophic water
2.22 Water supply water
2.23 Industrial wastewater
2.24 Industrial water industrial water
2.25 Oligotrophic
2.26 Boiler water boiler water
2.27 Filtration
2.28 Aerobic condition
2.29 Lake bottom hydrosphere hypolimnion
2.30 Lake warm water layer epilimnion
2.31 Septic tank septic tank

- 2.32 Chemical treatment
- 2.33 Chemical coagulation
- 2.34 Activated sludge activated sludge
- 2.35 Activated sludge treatment
- 2.36 Adsorption efficiency of activated sludge
- 2.37 Active sludge suspended solids concentration of suspended solids of an activated sludge
- 2.38 Polyelectrolytes
- 2.39 Cooling water cooling water
- 2.40 Ideal natural community expected natural community
- 2.41 Centrifugation
- 2.42 Ion exchange ion exchange
- 2.43 Ion exchange material ion-exchange material
- 2.44 Regeneration of the ion exchange material
- 2.45 Ion exchange mixed bed mixed bed
- 2.46 Sterilization
- 2.47 Condensed flocculation
- 2.48 Concentration (thickening)
- 2.49 Aeration
- 2.50 Demineralization (demineralization)
- 2.51 Deionization
- 2.52 Softening
- 2.53 Domestic sewage; domestic waste water
- 2.54 Biological filter; trickling filter; percolating filter
- 2.55 Bottom deposit
- 2.56 Water quality standard
- 2.57 Water quality benchmark water quality criteria
- 2.58 Dechlorination
- 2.59 Degassing degasification
- 2.60 Dehydration
- 2.61 Desalting desalination
- 2.62 Thermocline
- 2.63 Sludge
- 2.64 Sewage plant effluent effluence effluent; waste effluent
- 2.65 Physicochemical treatment

- 2.66 Bacterial bed bacteria bed
- 2.67 Disinfection
- 2.68 Digestion
- 2.69 Nitrification
- 2.70 Floc floc
- 2.71 Anaerobic condition
- 2.72 Oxidation pond oxidation pond
- 2.74 Rain water
- 2.75 Prechlorination
- 2.76 Raw water raw water
- 2.77 Raw sewage raw sewage
- 2.78 Distillation
- 2.79 Natural purification self-purification

Foreword

To protect the environment and protect human health in order to implement the Environmental Protection Law of the People's Republic of China and the Law of the People's Republic of China on Water Pollution Prevention and Control Kang, standardize water quality vocabulary, and develop this standard.

This standard is for the first part and the second part of the water quality vocabulary (GB 6816-86) and the third part of the water quality vocabulary ~ Revision of Part VII (GB 11915-89).

This standard was first published in 1986 and 1989 respectively. The original drafting unit was China Environmental Monitoring Station. This is the first revision.

The revised standard is divided into seven parts.

1. Water quality vocabulary part one;
2. Water quality vocabulary part two;
3. Water quality vocabulary part III;
4. Water quality vocabulary part IV;
5. Water quality vocabulary part five;
6. Part 6 of the water quality vocabulary;
7. Part 7 of the water quality vocabulary.

The definition of the vocabulary in this section is a term specifically designed for water quality features, including the terminology of the first part of the Water Quality Vocabulary and Definition (including corresponding English terms), which may be the same as the terminology currently published at home and abroad, but when applied to different fields, they the definition may also be different.

This part of the vocabulary is equivalent to the international standard "Water Quality Vocabulary Part 1" (ISO 6107.1-2004), English terms and ISO 6107.1-2004 is consistent. Some entries may appear twice, but the interpretation is different and applies to the interpretation of different situations.

From the date of implementation of this standard, the national environmental protection standard "Water" approved and issued by the former National Environmental Protection Agency on October 10, 1986 the first part and the second part of the vocabulary (GB 6816-86) and the original National Environmental Protection Agency approved and released on December 25, 1989 the national environmental protection standard "Water Quality Vocabulary Part III - Part 7" (GB 11915-89) is abolished.

This standard was formulated by the Science and Technology Standards Department of the Ministry of Environmental Protection.

This standard is mainly drafted by. China Environmental Monitoring Center, Liaoning Provincial Environmental Monitoring Experimental Center.

This standard was approved by the Ministry of Environmental Protection on November 5, 2010.

This standard has been implemented since March 1, 2011.

This standard is explained by the Ministry of Environmental Protection.

Water quality vocabulary part one

1 Scope of application

This standard specifies the terms that are specifically provided for water quality characteristics.

2 Noun terms

Storm water; storm water runoff Ground runoff discharged into waterways due to heavy rain.

2.2 Storm sewage

The ground runoff formed by the rain or snow (ice) melting is mixed with the sewage.
