

INDUSTRY STANDARD OF THE PEOPLE'S REPUBLIC OF CHINA

HJ 596.2-2010

Replacing GB 6816-1986; GB/T 11915-1989

Water quality. Vocabulary. Part 2

水质 词汇 第二部分

(English Translation)

Issued on: November 5, 2010

Implemented on: March 1, 2011

Issued by: Ministry of Ecology and Environment

Table of Contents

Foreword

1 Scope of application

2 Noun terms

2.1 Proportional sampling proportional sampling

2.2 Pasteurization

2.3 Saturated zone

2.4 Measured object determinand

2.5 Specific conductance; electrical conductivity

2.6 Standard uncertainty

2.7 Surfactant active agent; surfactant activator

2.8 Poisson distribution poisson distribution

2.9 Discrete sampling

2.10 Uncertainty class A evaluation of uncertainty

2.11 Uncertainty Class B assessment type B evaluation of uncertainty

2.12 Uncertainty of counting

2.13 Sampling

2.14 Sampling point sampling point

2.15 Sampling line sampling line

2.16 Sampler

2.17 Sampling probe sampling probe

2.18 Sampling network sampling network

2.19 Parameter

2.20 Uncertainty of measurement

2.21 Test sample test portion

2.22 Clarification of clarification

2.23 Clarifier;; settling tank; sedimentation basin

2.24 Dense non-aqueous phase liquids; DNAPL

2.25 Secondary validation secondary validation

2.26 Water conductivity (water conductivity)

2.27 Isokinetic sampling

2.28 Bottom sediment bottom sediment

2.29 Lower limit of quantification; limit of determination

- 2.30 Quantitative repeatability
- 2.31 Quantitative reproducibility
- 2.32 Qualitative method
- 2.33 Qualitative repeatability
- 2.34 Qualitative reproducibility
- 2.35 Multi-level sampler multi-level sampler
- 2.36 Reproductive propagule; reproductive germ
- 2.37 Unsaturated zone unsaturated zone
- 2.38 Non-ionic surface active agent
- 2.39 Classification characteristic
- 2.40 Phenolphthalein endpoint phenolphthalein end-point alkalinity
- 2.41 Packer
- 2.42 Corrosive corrosivity
- 2.43 Composite borehole multiple boreholes
- 2.44 Eutrophic eutrophication
- 2.45 Irrigation water irrigation water
- 2.46 Diatom diatoms
- 2.47 Over-dispersion
- 2.48 Excessive dispersion parameter μ over-dispersion factor
- 2.49 Seasea
- 2.50 Sea sea
- 2.51 Estuary Estuary
- 2.52 River river
- 2.53 Lake Lake
- 2.55 Chemical oxygen demand chemical oxygen demand, COD
- 2.56 Recovery rate recovery
- 2.57 Mixed media filtration mixed media filtration
- 2.58 Mixed sample composite sample
- 2.59 Matrix potential energy
- 2.60 Pressure filtration pressure filtration
- 2.61 Methyl red indicator endpoint alkalinity methyl red endpoint alkalinity
- 2.62 Monitoring
- 2.63 Scissor grab scissor grab
- 2.64 Detector; particle detector
- 2.65 Detection box detection set

- 2.66 Detection limit limit of detection
- 2.67 Alkalinity alkalinity
- 2.68 Overlap error overlap error; crowding error crowding error
- 2.69 Colloidal suspension
- 2.70 Stage water stepped feed
- 2.71 Stage aeration; gradient aeration tapered aeration
- 2.72 Contact Stabilization
- 2.73 Absolute salinity absolute salinity
- 2.74 Balanced proportionality
- 2.75 Flora colony
- 2.77 Rapid sand filtration rapid sand filtration
- 2.78 Langelier index
- 2.79 Continuous sampling continuous sampling
- 2.80 Sensitivity K sensitivity
- 2.81 Chloramines
- 2.82 Chlorination
- 2.83 Slow sand filtration slow sand filtration
- 2.84 Sodium absorption ratio, SAR
- 2.85 Parallel number parallel counts
- 2.86 Nested pressure gauge nested piezometers
- 2.87 Aggressive aggressivity
- 2.88 Aggressive water
- 2.89 Light non-aqueous phase liquids, LNAPL
- 2.91 Dissolved solids
- 2.92 Dissolved oxygen curve

Foreword

To protect the environment and protect human health in order to implement the Environmental Protection Law of the People's Republic of China and the Law of the People's Republic of China on Water Pollution Prevention and Control Kang, standardize water quality vocabulary, and develop this standard.

This standard is for the first part and the second part of the water quality vocabulary (GB 6816-86) and the third part of the water quality vocabulary ~ Revision of Part VII (GB 11915-89).

This standard was first published in 1986 and 1989 respectively. The original drafting unit was China Environmental Monitoring Station. This is the first revision.

The revised standard is divided into seven parts.

1. Water quality vocabulary part one;
2. Water quality vocabulary part two;
3. Water quality vocabulary part III;
4. Water quality vocabulary part IV;
5. Water quality vocabulary part five;
6. Part 6 of the water quality vocabulary;
7. Part 7 of the water quality vocabulary.

The definition of the vocabulary in this section is a term specifically designed for water quality features, including the terminology of the Water Quality Vocabulary Part II and Definition (including corresponding English terms), which may be the same as the terminology currently published at home and abroad, but when applied to different fields, they the definition may also be different.

This part of the vocabulary is equivalent to the international standard "Water Quality Vocabulary Part 2" (ISO 6107.2-2006), English terms and ISO 6107.2-2006 is consistent. Some entries may appear twice, but the interpretation is different and applies to the interpretation of different situations.

From the date of implementation of this standard, the national environmental protection standard "Water" approved and issued by the former National Environmental Protection Agency on October 10, 1986 the first part and the second part of the vocabulary (GB 6816-86) and the original National Environmental Protection Agency approved and released on December 25, 1989 the national environmental protection standard "Water Quality Vocabulary Part III - Part 7" (GB 11915-89) is abolished.

This standard was formulated by the Science and Technology Standards Department of the Ministry of Environmental Protection.

This standard is mainly drafted by. China Environmental Monitoring Center, Liaoning Provincial Environmental Monitoring Experimental Center.

This standard was approved by the Ministry of Environmental Protection on November 5, 2010.

This standard has been implemented since March 1, 2011.

This standard is explained by the Ministry of Environmental Protection.
