## Foreword

To protect the environment and protect human health in order to implement the Environmental Protection Law of the People's Republic of China and the Law of the People's Republic of China on Water Pollution Prevention and Control Kang, standardize water quality vocabulary, and develop this standard.

This standard is for the first part and the second part of the water quality vocabulary (GB 6816-86) and the third part of the water quality vocabulary ~ Revision of Part VII (GB 11915-89).

This standard was first published in 1986 and 1989 respectively. The original drafting unit was China Environmental Monitoring Station. This is the first revision.

The revised standard is divided into seven parts.

1. Water quality vocabulary part one;
2. Water quality vocabulary part two;
3. Water quality vocabulary part III;
4. Water quality vocabulary part IV;
5. Water quality vocabulary part five;
