What this standard covers

This standard specifies the determination of barium by flame atomic absorption spectrophotometry. This standard applies to high concentrations of soluble barium and total wastewater Determination of barium. The method detection limit is 1. 7mg/L, determination range of 6. 8 ~ 500mg/L.

Document data

International classification (ICS): 13.060.

Chinese classification (CCS): Z16.

Estimated length of the Chinese original: 12,184 words.

Supersedes the earlier edition GB/T 15506-1995.
