What this standard covers

This standard applies to general surface water and groundwater in the determination of low levels of sulfate. This method is suitable for mass concentration range of 8 ~ 200mg/L. This method has been to take 13 river, lake samples tested to determine the concentration range of 8 ~ 85mg/L, the relative standard deviation of 0.15% to 7%, the recovery rate 97.9% ~ 106.8%.

Document data

International classification (ICS): 13.060.

Chinese classification (CCS): Z50.

Estimated length of the Chinese original: 7,779 words.
