### What this standard covers

This standard specifies the compression-ignition engine vehicles opaque smoke emission measurement method of the main equipment opacity smoke meter specifications, features and performance of the technical requirements and test methods, computer control software features basic requirements. Filter paper smoke meter specifications, features and performance of the technical requirements and test methods, see HJ/T4 diesel filter type smoke meter technical conditions. This standard specifies the inspection station daily equipment inspection, inspection station on-site installation equipment and type approved equipment inspection project requirements and test methods. This standard applies to compression-ignition engine vehicle exhaust smoke free acceleration method of measuring equipment production, use and type approval test.

### Document data

International classification (ICS): 13.040.50.

Chinese classification (CCS): Z60.

Estimated length of the Chinese original: 28,249 words.
