1 Foreword

HS/T 75-2023 was issued by General Administration of Customs on 11 December 2023.

The HS/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies a method for the quantitative analysis of mineral oil content in petroleum lubricants using rapid chromatography. This standard is applicable to the determination of mineral oil content in petroleum lubricants composed of mineral oil and additives. Petroleum lubricants contain additives that should be adsorbed by the elution column.

HS/T 75-2023 falls under ICS 71.040, in the field of chemical technology.

This catalogue holds 9 other HS/T standards in that field.

In this catalogue, HS/T standards carry edition years from 2006 to 2024.

3 About this standard

Sector: Customs Industry Standard (Recommended)

Issued by: General Administration of Customs

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

SH/T 0805-2008 - Determination of the filterability of lubricating oils

HS/T 78-2023 - Verification method for hydrocarbon lubricating oil types

5 Classification and status

International classification (ICS): 71.040

Chinese Standard Classification (CCS): E 34

Prefix HS/T: recommended standard.
