1 Scope
2 Normative references
3 Terms and definitions
3.2 Symbol
3.3 Code
4 Beach monitoring
4.1 Observation delay data of ocean stations (points)
4.2 Delay data of buoy observation
4.3 Observation Delay Data of Volunteer Ship
4.4 Observation delay data of high frequency ground wave radar
4.5 Observation Delay Data of Standard Ocean Section
5 Classification indicators and criteria
5.2 Observation of real-time data from marine stations (points)
5.3 Standardized data of real-time data observed by marine stations (points)
6 Water quality status judgment
6.1 Delay data of buoy observation (Excel file)
6.2 Real-time raw data of buoy observation (XML file)
6.3 Standardized data of buoy observation data
7 Health Risk Discrimination
7.1 Compilation of delayed data of volunteer ship observation
7.2 Observation of real-time raw data by volunteer ships
7.3 Standardized data of observation data of volunteer ships
7.4 Time range test
7.5 Location inspection
7.6 Landing inspection
7.7 Congruence test
7.8 Illegal code inspection
7.9 Range check
8 Judgement of swimming suitability
8.1 Standardized data of HF ground wave radar observation data
8.2 X-band radar observation data standardized data

8.3 Quality Control of Observation Data of Volunteer Ships
8.4 Quality Control of Observation Delay Data of HF Ground Wave Radar
8.5 Quality control of standard ocean cross-section observation data
9 Judging the annual water quality level of the beach
9.1 File Naming Rules
9.2 File record format and description

1 Foreword

HY/T 0309-2021 was issued by Ministry of Natural Resources of the People's Republic of China on 1 April 2021 and has been in force since 1 June 2021.

The HY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

2 Scope Preview

This document specifies the classification and codes of ocean observation items and elements. This document is applicable to the analysis, management and data sharing of my country's marine hydrological and meteorological observation data.

HY/T 0309-2021 is filed under Chinese Standard Classification A 24, in the field of general, standardization and metrology.

This catalogue holds 43 other HY/T standards without an ICS number.

In this catalogue, HY/T standards carry edition years from 1992 to 2025.

3 About this standard

Issued by: Ministry of Natural Resources of the People's Republic of China

English translation: about 8 pages

Chinese original: about 12,125 characters
