Table of Contents

1 Scope
2 Normative references
3 Terms and Definitions
4 Classification of the Integrated Marine Environment Database
5 The original database of the marine environment
5.1 Classification of the original marine environment database
5.2 The table naming convention of the original marine environment database
5.3 Coding specifications for table fields in the original marine environment database
6 Basic database of marine environment
6.1 Classification of marine environment basic database
6.2 Naming conventions for marine environment basic database tables
6.3 Coding specification for table fields of marine environment basic database
7 Integrated Marine Environment Database
7.1 Classification of integrated marine environment database
7.2 The table naming convention of marine environment integration database
7.3 Coding specification for table fields of marine environment integration database
8 Marine Environmental Products and Results Database
8.1 Classification of marine environmental products and results database
8.2 Naming conventions for marine environmental products and results database tables

1 Foreword

HY/T 0328-2022 was issued by Ministry of Natural Resources of the People's Republic of China on 18 February 2022 and has been in force since 1 May 2022.

The HY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 16 pages in English translation.

2 Scope Preview

This document specifies the classification and coding specifications of databases in the field of marine environment, including the classification of comprehensive marine
