1 Foreword

HY/T 0343.7-2022 was issued by Ministry of Natural Resources of the People's Republic of China on 26 September 2022.

It is one of 3 parts of the HY/T 0343 series.

The HY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This document describes the data processing flow and method for partial pressure of carbon dioxide based on the continuous observation of the water-air balance method. This document is applicable to the data processing of partial pressure of carbon dioxide obtained from continuous on-site observation, but not to the partial pressure of carbon dioxide in seawater from satellite remote sensing. According to processing.

HY/T 0343.7-2022 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 287 other HY/T standards in that field.

In this catalogue, HY/T standards carry edition years from 1991 to 2025.

3 About this standard

Issued by: Ministry of Natural Resources of the People's Republic of China

English translation: about 7 pages

Chinese original: about 11,146 characters

4 Related standards

Other parts of this standard:

HY/T 0343.3-2022 - Part 3: Buoy-based monitoring

HY/T 0343.4-2022 - Part 4: Flux estimation based on pCO2 difference

Standards on related subjects:

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 45

Prefix HY/T: recommended standard.
