What this standard covers

This standard specifies the principles and technical requirements for determining the conditions of engineering sea ice conditions, calculating ice loads, obtaining engineering sea ice and environmental data, and establishing engineering sea ice environmental monitoring systems. This standard applies to the observation, testing and calculation of sea ice conditions in the Bohai Sea and the northern part of the Yellow Sea.

Document data

Chinese classification (CCS): A45.

Estimated length of the Chinese original: 41,458 words.

Supersedes the earlier edition HY/T 047-1999.
