1 Scope
2 Normative references
3 Terms and Definitions
3.1 Water sampling equipment
3.2 Underwater release device
3.3 Underwater communication equipment
3.4 Underwater positioning equipment
3.5 Underwater camera equipment
4 Marine hydrological instruments and equipment
4.1 Seawater temperature measuring instruments and equipment
4.2 Seawater salinity/conductivity measurement equipment
4.3 Water Depth Measuring Instruments and Equipment
4.4 Current measurement instruments and equipment
4.5 Wave measuring instruments and equipment
4.6 Tide measurement instruments and equipment
4.7 Sea ice measurement instruments and equipment
4.8 Multi-element measuring instruments and equipment
5 Ocean physics instruments and equipment
5.1 Instruments and equipment for measuring optical properties of seawater
5.2 Instruments and equipment for measuring seawater acoustic characteristics
5.3 Review of scientific research documents
5.4 Identification of scientific research documents
5.5 General and group standards for law enforcement teams
6 Marine chemical instruments and equipment
6.1 Mathematical foundations
6.2 Methods of representing geographical elements
6.3 Representation of ocean elements
6.4 Notes
6.5 Finishing10
7 Marine geological and geophysical instruments and equipment
7.1 Instruments and equipment for surveying marine topography and geomorphology

7.2 Marine stratigraphic detection instruments and equipment
7.3 Submarine heat flow measurement instruments and equipment
7.4 Marine gravity measurement instruments and equipment
7.5 Marine Geomagnetic Measurement Instruments and Equipment
7.6 Marine Seismic Measurement Instruments and Equipment
7.7 Sediment sampling equipment
7.8 File number
8 Marine biological instruments and equipment
8.1 Chlorophyll measuring instrument
8.2 Plankton, measuring instruments
8.3 Swimming Animal Survey Instruments
8.4 Biological sampling equipment
9 Integrated Ocean Observing System
9.1 Storage
9.2 Submersibles
9.3 Drag body

## 1 Foreword

HY/T 131-2010 was issued by State Oceanic Administration on 10 February 2010 and has been in force since 1 March 2010.

The HY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 11 pages in English translation.

## 2 Scope Preview

This standard specifies common basic terms and their definitions related to the process of marine informatization. This standard is applicable to the design, development, use, maintenance and formulation of related technical documents and document translation in the construction and management of marine informatization. Translation and other work.

HY/T 131-2010 falls under ICS 01.140; 07.060, in the field of generalities, terminology and documentation.

This catalogue holds 21 other HY/T standards in that field.

In this catalogue, HY/T standards carry edition years from 1992 to 2025.

## 3 About this standard

Issued by: State Oceanic Administration

English translation: about 11 pages

Chinese original: about 17,167 characters

## 4 Related standards

Standards on related subjects:

GB/T 2893.2-2020 - Graphical symbols - Safety colours and safety signs - Part 2: Design principles for product safety labels

GB/T 2893.1-2013 - Graphical symbols -- Safety colours and safety signs -- Part 1: Design principles for safety signs and safety markings

GB/T 2893.3-2010 - Graphical symbols -- Safety colours and safety signs -- Part 3: Design principles for graphical symbols used in safety signs

HY/T 0356-2023 - Classifications, codes and formats for the oceanographic survey thematic maps

## 5 Classification and status

International classification (ICS): 01.140; 07.060

Chinese Standard Classification (CCS): A 22

Prefix HY/T: recommended standard.
