9.1 Microscopic examination and analysis
9.2 Calculation of common community parameters
9.3 Fill in the report
9.4 Statistical analysis and graphing

1 Foreword

HY/T 135-2010 was issued by State Oceanic Administration on 31 August 2010 and has been in force since 1 October 2010.

The HY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the product composition and technical requirements of the seabed-based marine environment automatic monitoring platform system (hereinafter referred to as the seabed-based platform system) Requirements, test methods, inspection rules and signs, packaging, transportation, and storage requirements. This standard applies to the production, factory inspection and type inspection of seabed-based platform systems.

HY/T 135-2010 is filed under Chinese Standard Classification N 92, in the field of instruments and meters.

This catalogue holds 43 other HY/T standards without an ICS number.

4 About this standard

Issued by: State Oceanic Administration

English translation: about 7 pages

Chinese original: about 9,924 characters

5 Related standards

Standards on related subjects:

HY/T 144-2011 - Automatic weather station for VOS

HY/T 143-2011 - Small mooring buoy system for ocean observing

HY/T 142-2011 - Large mooring buoy system for ocean observing

6 Classification and status

International classification (ICS): 7.06

Chinese Standard Classification (CCS): N 92

Prefix HY/T: recommended standard.
