1 Foreword

HY/T 212-2016 was issued by State Oceanic Administration on 7 November 2016 and has been in force since 1 February 2017.

The HY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 6 pages in English translation.

2 Scope Preview

This standard specifies the hydrophilicity of the reverse osmosis membrane by contact angle method. This standard is applicable to the testing of the hydrophilicity of flat reverse osmosis membranes.

HY/T 212-2016 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 287 other HY/T standards in that field.

In this catalogue, HY/T standards carry edition years from 1991 to 2025.

4 About this standard

Issued by: State Oceanic Administration

English translation: about 6 pages

Chinese original: about 8,876 characters

5 Related standards

Standards on related subjects:

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

HY/T 222-2017 - Training Outlines for the Manned Submersible Pilot in Training

HY/T 217-2017 - The issue of green tide forecasts and warnings

HY/T 215-2017 - Guideline for marine biodiversity assessment in nearshore area

6 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 45

Prefix HY/T: recommended standard.
