1 Foreword

HY/T 225-2017 was issued by State Oceanic Administration on 20 July 2017 and has been in force since 1 November 2017.

The HY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 39 pages in English translation.

2 Scope Preview

This standard specifies the required conditions, preparation, deployment, diving, operation, floating, recovery, maintenance and emergency response of manned submersibles for diving operations. This standard is applicable to the organization and implementation of manned submersible diving operations during the test or operational phase.

HY/T 225-2017 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 287 other HY/T standards in that field.

In this catalogue, HY/T standards carry edition years from 1992 to 2025.

3 About this standard

Issued by: State Oceanic Administration

English translation: about 39 pages

Chinese original: about 42,477 characters

4 Related standards

Standards on related subjects:

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

HY/T 232-2018 - Specification for acceptance test of seawater cooling tower

HY/T 229-2018 - Structure confirmation method of marine bioactive material of certified reference material

HY/T 227-2018 - Technical guide to vulnerable area assessment of sea level rise impacts

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 45

Prefix HY/T: recommended standard.
