### What this standard covers

This standard specifies the method for the determination of halogenated organic compounds in seawater desalination concentrated seawater, mainly for the volatile halogenated hydrocarbons, chlorophenols, chloroacetic acid, trichloroacetaldehyde and organochlorine pesticides produced by the chlorine disinfectant during seawater desalination. This standard is applicable to the determination of volatile halogenated hydrocarbons, chlorophenols, chloroacetic acid, trichloroacetaldehyde and organochlorine pesticides in seawater desalination concentrated seawater, sea inlets and adjacent sea waters. See Appendix A for method detection limits.

### Document data

International classification (ICS): 07.060; 13.020.40.

Chinese classification (CCS): Z10.

Estimated length of the Chinese original: 27,230 words.
