What this standard covers

This standard specifies the requirements, methods and calculations for energy consumption testing of low temperature multi-effect distillation and reverse osmosis desalination plants. This standard is applicable to the energy consumption test of low-temperature multi-effect distillation and reverse osmosis desalination equipment. The energy consumption test of other types of seawater desalination equipment can be referred to.

Document data

International classification (ICS): 07.060; 91.140.

Chinese classification (CCS): P41.

Estimated length of the Chinese original: 16,174 words.
