1 Foreword

HY/T 267-2018 was issued by Ministry of Natural Resources of the People's Republic of China on 17 September 2018 and has been in force since 1 October 2018.

The HY/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 9 pages in English translation.

2 Scope Preview

This standard specifies the test items, test conditions and test methods of the seawater conductivity meter (hereinafter referred to as "conductivity meter"). This standard applies to the first detection, follow-up inspection and commissioning of seawater conductivity measuring instrument using electromagnetic induction principle and electrode measurement principle. Check detection.

HY/T 267-2018 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 287 other HY/T standards in that field.

In this catalogue, HY/T standards carry edition years from 1992 to 2025.

3 About this standard

Issued by: Ministry of Natural Resources of the People's Republic of China

English translation: about 9 pages

Chinese original: about 13,136 characters

4 Related standards

Standards on related subjects:

GB 4793.9-2013 - Safety requirements for electrical equipment for measurement, control and laboratory use - Part 9: Particular requirements for automatic and semi-automatic laboratory equipment for analysis and other purposes

GB 4793.7-2008 - Safety requirements for electrical equipment for measurement, control, and laboratory use - Part 7: Particular requirements for laboratory centrifuges

GB 4793.6-2008 - Safety requirements for electrical for measurement, control, and laboratory use - Part 6: Particular requirements for laboratory equipment for the heating of materials

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): N 09

Prefix HY/T: recommended standard.
