What this standard covers

This standard specifies the types, basic parameters, dimensions, and technical requirements of Y2 series and YX2 series 6kV high-voltage three-phase asynchronous motors, describes the corresponding test methods, and specifies the inspection rules, marking, packaging, and warranty period. This standard applies to the manufacture of general-purpose Y2 series and YX2 series 6kV high-voltage three-phase asynchronous motors (frame size 355??630). The manufacture of various series of motors derived from this series should refer to this standard.

Document data

International classification (ICS): 20.160.30.

Chinese classification (CCS): K22.

Supersedes the earlier edition JB/T 10444-2014.
