What this standard covers

This standard specifies the classification, marking, and technical requirements for metal bellows used in valves, describes the corresponding test methods, and specifies product inspection rules, marking, packaging, and ordering selection. This standard applies to the manufacture of metal bellows and their components for gate valves and globe valves; the manufacture of metal bellows for other types of valves should refer to this standard. This standard does not apply to non-metallic bellows or bellows for non-valve applications.

Document data

International classification (ICS): 23.060.01.

Chinese classification (CCS): N05.

Supersedes the earlier edition JB/T 10507-2005.
