1 Scope

This standard specifies the cleanliness and its assessment methods of rust preventive oils and cleanser for rolling bearings.

This standard is applicable to the inspection requirements for the cleanliness of rust preventive oils and cleansers for rolling bearings by the manufacturer and the user.

2 Normative References

The following documents contain provisions which, through reference in this standard, constitute provisions of this standard. For dated references, subsequent amendments to (excluding corrections to), or revisions of, any of these publications do not apply. However, the parties coming to an agreement based on this standard are encouraged to investigate whether the most recent editions of the standards apply. For undated references, the latest editions apply.
