What this standard covers

This standard specifies the processing and assembly quality, safety protection and environmental protection of laser selective sintering forming machine tools, as well as the requirements for machine tool accuracy inspection. It describes the test methods for machine tool operation and machine tool processing performance, and stipulates markings and instructions for use, as well as packaging, transportation and Storage. This standard applies to the manufacture of laser selective sintering forming machine tools using polymer powders and their composites as forming materials.

Document data

International classification (ICS): 25.080.99.

Chinese classification (CCS): J59.

Estimated length of the Chinese original: 17,183 words.
