What this standard covers

This standard specifies the requirements for processing and assembly quality and safety protection of fused deposition forming machine tools, describes the test methods for electrical device inspection, operation reliability, noise, operation protection function, short-stroke operation and forming ability, and stipulates the marking and use Instructions and packaging and storage. This standard applies to the manufacture of fused deposition forming machine tools using polymers and composite materials as forming materials. This standard does not apply to desktop fused deposition forming equipment.

Document data

International classification (ICS): 25.080.99.

Chinese classification (CCS): J59.

Estimated length of the Chinese original: 9,913 words.
