What this standard covers

This standard specifies the requirements for geometric accuracy and working accuracy of horizontal side-broaching machines. It describes the corresponding testing methods and specifies the inspection items. This standard applies to the accuracy inspection of horizontal side-bending machines for general use and with ordinary precision, with a rated tensile force less than or equal to 1000kN.

Document data

International classification (ICS): 25.080.30.

Chinese classification (CCS): J57.

Supersedes the earlier edition JB/T 10644-2006.
