1 Scope

This standard specifies the terms and definitions, classification and marking methods, technical requirements, test methods, inspection rules, marking, packaging, transportation and storage of woven air filters for air conditioners. This standard is applicable to woven air filters for air conditioners made of polypropylene, polyamide, polyester and other chemical fiber materials. Air filters for air purifiers, fresh air fans and similar products can also be used as a reference. Polyethylene woven air filters can also be used as a reference. This standard does not apply to intersect bonded air filters.
