What this standard covers

This standard specifies the type, basic parameters and technical requirements of material level switches, specifies the corresponding test methods, specifies the inspection rules and marking, packaging, transportation and storage. This standard is applicable to the manufacture of general-purpose material level switches for detecting material height during silo loading and storage, and is used as a reference for the manufacture of material level switches for bulk materials. This standard does not apply to material level switches used in explosive environments.

Document data

International classification (ICS): 53.040.20.

Chinese classification (CCS): J81.

Supersedes the earlier edition JB/T 10961-2010.
