What this standard covers

This standard specifies the structural type, technical requirements, and material requirements for metal-sealed lift-type plug valves. It describes the corresponding test methods and specifies inspection rules, marking, and supply requirements. This standard applies to the manufacture of metal-sealed lift-type plug valves with nominal sizes of DN25?DN600 and nominal pressures of PN16?PN250, or nominal sizes of NPS1?NPS24 and nominal pressures of Class150°Class1500.

Document data

International classification (ICS): 23.060.20.

Chinese classification (CCS): J16.

Estimated length of the Chinese original: 20,270 words.

Supersedes the earlier edition JB/T 11152-2011.
