What this standard covers

This standard specifies the classification, structural types, technical requirements, and material requirements for pipeline pigging valves used in the petroleum and natural gas industries. It describes the corresponding test methods and specifies inspection rules, marking, supply, and packaging. This standard applies to the manufacture of flanged steel pigging valves with nominal sizes of DN50-DN1000 and nominal pressures of PN16-PN400, or nominal sizes of NPS2-NPS40 and nominal pressures of Class 150-Class 2500, for working media such as oil, natural gas, and chemicals, used for receiving and launching pipeline pigs.

Document data

International classification (ICS): 23.060.99.

Chinese classification (CCS): J16.

Estimated length of the Chinese original: 20,286 words.

Supersedes the earlier edition JB/T 11175-2011.
