Foreword

JB/T 11259-2026 is a recommended industry standard of the People's Republic of China in the Machinery sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 December 2026.

This edition replaces JB/T 11259-2011.

It is administered by the National Technical Committee for Testing Machines Standardization.

Classification: ICS 19.100; CCS N78.

1 Scope

JB/T 11259-2026 belongs to the series on non-destructive testing instruments and relates to multifrequency eddy current testing equipment. Such instruments excite a test coil with more than one frequency at the same time in order to inspect conductive materials and components without damaging them. The document applies to this equipment as an instrument product.

Manufacturers of eddy current instruments, laboratories that test them and organizations that purchase or operate non-destructive testing equipment will refer to it. It is a voluntary industry standard, indicated by /T in the code. The Ministry of Industry and Information Technology issued it on 1 June 2026, with effect from 1 December 2026, and it replaces JB/T 11259-2011.
