What this standard covers

This standard specifies the technical requirements for polyvinyl chloride (PVC) reflective and transmissive projection membranes, describes the corresponding test methods, and specifies acceptance rules, marking, packaging, transportation, and storage. This standard applies to the manufacture of reflective or transmissive projection membranes made primarily of polyvinyl chloride resin, with the addition of plasticizers and stabilizers, through processes such as calendering or calendering and lamination.

Document data

International classification (ICS): 37.060.10.

Chinese classification (CCS): N42.

Supersedes the earlier edition JB/T 11376-2013, JB/T 11850-2014.
