What this standard covers

This standard specifies the structural types, technical requirements, and material requirements for fluoroplastic-lined steel gate valves. It describes the corresponding test methods, inspection rules, marking, painting, packaging, storage, transportation, and supply requirements. This standard applies to the manufacture of fluoroplastic-lined steel gate valves with nominal sizes from DN25 to DN1050 and nominal pressures not exceeding PN25, applicable temperatures from -29°C to 180°, and applicable media consisting of low-viscosity corrosive gases or liquids such as acids, alkalis, or salts without hard solid particles.

Document data

International classification (ICS): 23.060.30.

Chinese classification (CCS): J16.

Estimated length of the Chinese original: 17,143 words.

Supersedes the earlier edition JB/T 11488-2013.
