What this standard covers

This standard specifies the type, basic parameters, dimensions, and technical requirements of three-phase asynchronous motors for drilling equipment used in foundation construction, describes the corresponding test methods, and specifies inspection rules, marking, and packaging requirements. This document applies to the manufacture of three-phase asynchronous motors for drilling equipment used in foundation construction. The manufacture of various series of motors derived from this series should refer to this standard.

Document data

International classification (ICS): 91.22.

Chinese classification (CCS): P97.

Estimated length of the Chinese original: 15,117 words.

Supersedes the earlier edition JB/T 11678-2013.
