What this standard covers

This standard specifies the typical structure and technical requirements for welded ball valves in steel pipes, describes the corresponding test methods, and specifies inspection rules, marking, protection, packaging, and storage. This standard applies to the manufacture of welded ball valves in steel pipes with nominal sizes of DN15~DN50 and nominal pressures not exceeding PN40, or nominal sizes of DN65~DN1600 and nominal pressures not exceeding PN25, temperatures of 0°C~180°, and media of water or steam.

Document data

International classification (ICS): 23.060.10.

Chinese classification (CCS): J16.

Estimated length of the Chinese original: 16,150 words.

Supersedes the earlier edition JB/T 12006-2014.
