What this standard covers

This standard stipulates the classification and temperature group, type and basic parameters, technical requirements, test methods, inspection rules and signs, packaging, transportation and storage of pneumatic hoist bridge cranes. This standard applies to the manufacture of air hoist bridge cranes that use an air motor as the power device and an air hoist as the lifting mechanism and are used in general working environments and explosive environments specified in GB 25286.1.

Document data

International classification (ICS): 53.020.20.
