### What this standard covers

This standard specifies the technical requirements, test methods, inspection rules and markings, quality certificates, rust prevention, packaging, storage and transportation of internal combustion engine supercharger turbine shell castings. This standard is applicable to the manufacture of internal combustion engine supercharger turbine shell castings using shell molds, sand molds or molds with thermal conductivity equivalent to shell molds or sand molds. The manufacture of turbine shell castings using other casting methods can be used as a reference.

### Document data

International classification (ICS): 77.140.80.

Chinese classification (CCS): J31.

Estimated length of the Chinese original: 14,120 words.
