What this standard covers

This standard specifies the energy consumption testing methods of die-casting mold temperature machines, calculation of power consumption per unit efficacy, energy efficiency grade assessment, energy saving evaluation value and energy efficiency grade labeling. This standard applies to energy consumption classification activities of oil-type mold temperature controllers for die casting.

Document data

International classification (ICS): 25.120.30.

Chinese classification (CCS): J61.

Estimated length of the Chinese original: 8,864 words.
