What this standard covers

This standard specifies the energy efficiency grade assessment, energy saving evaluation value, assessment method, energy efficiency grade labeling and assessment examples for die-cast aluminum furnaces. This standard is applicable to the energy efficiency rating activities of die-casting aluminum melting furnaces and holding furnaces that use liquid, gaseous fuel or electric energy as heat sources in die-casting production.

Document data

International classification (ICS): 25.120.30.

Chinese classification (CCS): J61.

Estimated length of the Chinese original: 8,865 words.
