What this standard covers

This standard specifies the test conditions, test methods, calculation of effective power, calculation and recording of energy efficiency values for belt conveyor energy efficiency testing methods. This standard is applicable to the energy efficiency testing of belt conveyors specified in GB/T 10595. The energy efficiency testing of other belt conveyors can be used as a reference. This standard does not apply to downward transport belt conveyors in the power generation state.

Document data

International classification (ICS): 53.040.01.

Chinese classification (CCS): J81.
